

Cable Entrance Plates and Hood

Reversible • Non-metallic • Cable protection at its best

Arlington's new REVER SIBLE entrance plate not only protects cable, but delivers good looks and installation versatility.

Use it facing IN – or OUT. It's easy to install. And, it's the best way to run cable where you want it.

- Non-rusting, paintable plastic
- Versatile, easy to use
- Install facing in or out

Installation Instructions

Install one of Arlington's low voltage mounting brackets (not supplied) at entry and/or exit locations. Use LV1 for the single-gang CE1, and LV2 for the two-gang CE2.

1 For entry location: Use the mounting bracket as a template, and cut hole for entry location. Feed wires into the cable entrance plate. Make sure that the hood is in the desired orientation; facing in or out.

2 For wire exit: Install low voltage mounting bracket (repeat above instructions). Fish wires from behind the wall surface and pull through the bracket. Feed wires into CE1 or CE2 with the hood in the correct orientation (in or out).

- 3 Attach both (entry and/or exit) cable entrance plates to the LV1 or LV2 mounting brackets.
- 4 Connect wires to electronic equipment.

Installation Instructions

Use one or more of Arlington's low voltage mounting brackets (not supplied) to install The SCOOP™ – the single-gang LV1, two-gang LV2, three-gang LV3 or four-gang LV4.

1 Use the mounting bracket as a template, then cut hole for entry location. Attach the mounting bracket to the wall.

2 Feed wires through The SCOOP™ (CED1), with it facing in or out, as desired. Attach to the mounting bracket with the supplied screws. Repeat as many times as necessary.

3 Connect wires to electronic equipment.
