

# 8" VERSI-DUCT® VERTICAL CABLE MANAGEMENT

## 8" Channel Cable Management

Since CAT 6A installations typically include larger diameter cable and density is an issue, Leviton now offers an 8" Versi-Duct vertical cable management system, developed for use in today's large scale deployments.

Front & Rear w/ designer cover (40" section shown)

### FEATURES

- Injection molded products eliminate sharp edges and protect cable integrity
- Durable ABS plastic channels withstand years of use in demanding environments
- Large finger pass-through space aligns with rack units
- Included cover features unique, integrated dual-hinge for easy accessibility
- 80" Channel ships in two 40" pieces for easier handling and installation
- Front only or front/rear configurations
- Channels kitted with PVC plastic cover, slack spools, cable retainers and mounting brackets
- Same channels can be easily adapted for side or center mount applications
- Rack-mount brackets snap into vertical channel with no additional hardware required

## 8" Versi-Duct Capacity

The chart below references the maximum recommended capacity of cable allowed for the installation based on the outside cable diameter. Allowances should be made for proper bend radius and future additions.

Feature	Channel Depth (WxD)	Area (In <sup>2</sup> )	CAT 6A Capacity (.354" Cable)	CAT 6 Capacity (.250" Cable)	CAT 5e Capacity (.180" Cable)
8" Channel Size (per side)	8" x 8"	60	192	384	738
Finger Spacing	5.5" x 1"	5.5	24	60	114
Large Passthrough	4.8" x 2.6"	12.7	72	120	258
Small Passthrough	2.6" x 2.6"	6.8	36	72	138

### Slack Loop

Stores cable slack and maintains proper bend radius for CAT 6A cables

### Cable Retainer

Snaps into multiple positions along channel fingers to secure cable bundles
