

Magnetic Wire Holder

Large Magnetic Wire Holder

MAGNET

- N 35 Grade Neodymium
- Min. 23lb Retention
- NiCuNi Coating
- Temperature Tolerance 40°C – 90°C

MAGNET CUP

- Steel Cup with Zinc plated coat.

PLASTIC CARRIER

- Material- Acetal
- Ultrasonic Weld to Magnet
- Retractable Claws

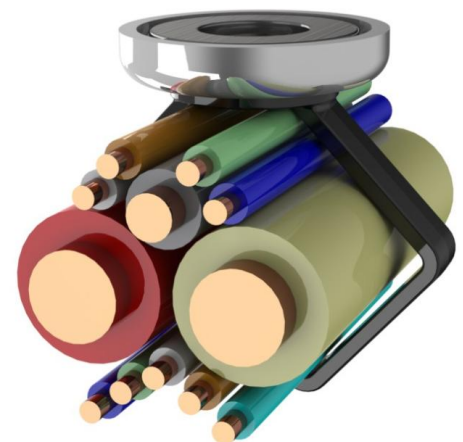

The Magnetic Wire Holder offers the best solution, to a variety of problems regarding wire and cable management across multiple industries.

The unique and innovative design allows this product to be used over a number of different fields including automotive, fiber optics, aeronautics, nautical, AV, and many more.

Combining a Rare-Earth magnet with a flexible plastic carrier allows the Magnetic Wire Holder to be re-used with the same functionality as the first time.

The Large version of the Magnetic Wire Holder has been designed to be capable of not just holding more wires and cables, but also conduits. The Large version differs from the Small and Medium versions by having a larger magnet attached that can withstand more force and weight.

The Large version can contain a number of 1/2" wires as well as 3/4" bundles.
