

Magnetic Wire Holder

Medium Magnetic Wire Holder

MAGNET

- N 35 Grade Neodymium
- Min. 16lb Retention
- NiCuNi Coating
- Temperature Tolerance 40°C – 90°C

MAGNET CUP

- Steel Cup with Zinc plated coat.

PLASTIC CARRIER

- Material- Acetal
- Ultrasonic Weld to Magnet
- Retractable Claws

The Magnetic Wire Holder offers the best solution, to a variety of problems regarding wire and cable management across multiple industries.

The unique and innovative design allows this product to be used over a number of different fields including automotive, fiber optics, aeronautics, nautical, AV, and many more.

Combining a Rare-Earth magnet with a flexible plastic carrier allows the Magnetic Wire Holder to be re-used with the same functionality as the first time.

The Medium version of the Magnetic Wire Holder is more or less for everyday wire management usage. Not being able to fit in tight areas, nor contain large conduits and/or cables, the Medium version is the perfect "in-between" that allows for a wide variety of applications.

The Medium version can contain a number of 1/4" wires as well as 1/2" bundles.
