The Magnetic Wire Holder offers the best solution, to a variety of problems regarding wire and cable management across multiple industries. The unique and innovative design allows this product to be used over a number of different fields including automotive, fiber optics, aeronautics, nautical, AV, and many more.

Combining a Rare-Earth magnet with a flexible plastic carrier allows the Magnetic Wire Holder to be re-used with the same functionality as the first time.

The Magnetic Wire Holder Rectangle version offers the same design and concept as the “rounded” style, with the addition of a Rectangle Magnet. The Rectangle Magnet allows for easy wire management along rods, poles, or any thin surface, while maintaining the same strength as its counterparts.

The Small version can contain a number of 1/8” wires as well as 1/4” bundles.
