

Why use hose reels?

Why use hose reels? Because they make hose handling more efficient and safer. Your hoses, cables and cords will last up to five times longer. You will improve hose management, which decreases labor costs. Your chances of injuries from tripping hazards will decrease, which

saves lost work time, medical bills and higher insurance. You also save the cost of replacing expensive hoses, cables and cords that get run over by fork lifts and other vehicles, which saves equipment costs. Here are the most compelling reasons to use hose, cord and cable reels.

7000 Series

Fry's Napa AutoCare Center, Columbia City, Indiana

80000 Series

Wabash National Corporation, Lafayette, Indiana

Efficiency

An organized, clean workplace is proven to be more efficient

Safety

Reduce accidents and insurance expense: Slips, trips, and falls are the leading causes of work stoppage losses in industry.

600968

Orchard Ridge Country Club
Fort Wayne, Indiana

Protect Equipment

Hoses and cords last five times longer when stored on a reel.

600910

Orchard Ridge Country Club
Fort Wayne, Indiana

Stop Leakages

Hoses on reels can reduce the threat of expensive air and water leakages.

The Bottom Line:

Increase Productivity

Locating hoses and cords where and when you need them increases productivity. All of these factors contribute to an improved work environment, which saves time, equipment and money.

OSHA says reduce your slips, trips and falls

Slips, trips and falls constitute the majority of general industry accidents, which cause 15% of all accidental deaths, and are second only to motor vehicles as a cause of fatalities. The OSHA standards for walking and working surfaces apply to all permanent places of employment, except where only domestic, mining, or agricultural work is performed (www.osha.gov).

PRODUCT SOLUTIONS

Engineered for Excellence

Reelcraft: Better by Design

Reelcraft's reels are better by design because of our lasting commitment to excellence. Our engineering team is well known for designing durable, high quality products. Our standard features include durable, corrosion-resistant

powder coat paint, multi-position guide arms for versatile mounting options and heavy-duty, reinforced steel stampings for increased strength. Our reels are permanently factory-lubricated for a long, trouble-free service life.

All of these features, and many more, add up to make "the reel difference."

Rely on Reelcraft's commitment to excellence for the highest quality hose, cord and cable reels.

Reinforced Steel

The steel-stamped guide arm is reinforced to reduce bending due to angular pull.

Improved Connection

The elongated brass connector and proprietary adhesion process provide a better crimp to the hose.

Stress-free Swivel

Our full-flow design combines the highest grade seal design with supporting bearing surfaces to insure the longest possible life.

Corrosion-Resistant

Steel components are individually powder coated to virtually eliminate corrosion.

Long Service Life

Field-proven swivel assures long service life.

Finish with Quality

Our components undergo a special five-stage cleaning process and are individually powder-coated for the highest quality paint adhesion. Excess powder is reclaimed to be environmentally friendly.

Kinkless Hose

High quality PVC hose is specially blended for use on reels

Sealed Connection Points

Swivel and hose inlet connections seal against leaks

Adjustable Guide Arm

Multiple guide arm positions provide versatile uses and easier field adjustment

Trouble-Free Performance

Fewer components increase the service life of the reel and improve performance

Long Life Drive Spring

Declutching arbor virtually eliminates possibility of spring damage due to reverse winding of reel spool.

Enclosed Drive Spring

Drive mechanism is enclosed for protection against the environment.

Robust Latch

Wide profile combined with special spring assures maximum service life.

Structural Strength

Welded heavy gauge steel frame includes dramatically flanged edges and stiffening ribs for lighter weight, yet stronger components for ease of handling and installation.

Easy to Mount

Attaches to most structurally sound surfaces. Edges are curved for safety.
