YELLOW JACKET. AMS™ Interconnect™

Interconnects are half length (18"), 5 channel cable protectors with a dog bone or T-bone connector on one end and an Hour Glass™ connector on the other end.

This cable protector with a dog bone connector interfaces the Yellow WASP™ AMS™ to the Yellow Jacket® Classic (YJ5-125), Bumble Bee® (BB5-125 D) and other 5 channel dog bone based cable protectors.

With a T-bone connector it interfaces the WASP™ AMS™ to the Bumble Bee® with a T-bone connector (BB5-125 T). These connections require two **YELLOW JACKET. AMS™** Interconnects. All channels are 1.25" in diameter.

YELLOW JACKET. AMS™ Center Section

The **YELLOW JACKET. AMS™** Center Section completes the WASP AMS ramp system. It is needed when all **YELLOW JACKET. AMS™** center sections in the customer's inventory are in use or the customer has not previously ordered any **YELLOW JACKET. AMS™** Center Sections. All channels are 1.25" in diameter.
