regarding warranty limitations

MADE IN USA

Bumble Bee® cable protectors are designed to handle heavy duty applications while cutting cost and weight. Bumble Bees compare favorably to the specifications of other heavy duty cable protectors and offer the advantage of being made from Yellow Jacket, Inc.'s proprietary cast molded polyurethane, Durathane®.

Protects and Organizes

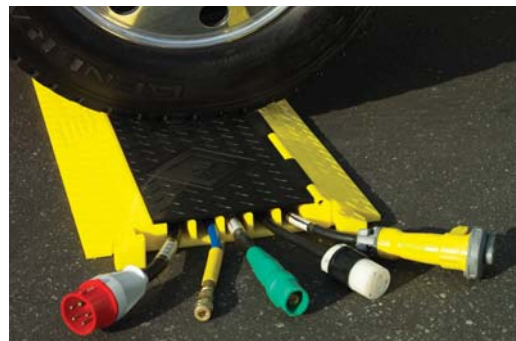

- Superior protection for electrical cables, hydraulic and pneumatic hoses and data, video and signal lines
- Multi-channel design helps organize cables
- Rounded dividers protect cables from snags and tears
- Line of accessories to build a variety of configurations

Choice of Connectors

- Dog Bone connector will fit with Yellow Jacket® Classic and other cable protectors licensed to use the dog bone connector. The dog bone connector is designed for heavier weight cable protectors.
- T-bone connectors are designed for lighter weight cable protectors like the Bumble Bee. They form very tight connections to keep light weight protectors from separating under pressure, are shorter and reduce trip hazards.

T-bone connector

Dog bone connector

Durable, Easy to Assemble and Load

- Single piece design
- Top hinged lid for easy access
- No tools or hardware required to configure
- Highly impact resistant
- Dynamic load bearing properties

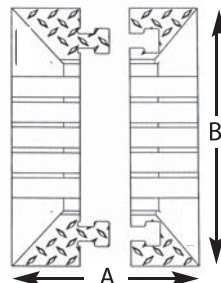

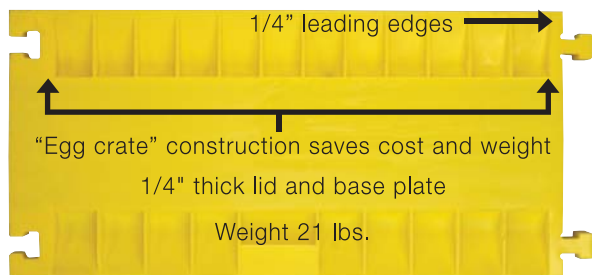

Safety Features

- Highly visible - distinctive black lid and yellow ramps
- Skid resistant diamond pattern used on all upper surfaces
- Non-conductive, no metal parts
- WASP® ADA compatible special access ramps are available
- Resistant to oil and solvents
